酸化グラフェン Graphene Oxide

BEST SERVICE

Customize

用途に合わせて、様々なサイズや酸化度、化学修飾を施すことが可能です。

We can prepare various sizes, degrees of oxidation, and chemical modification according to the request.

Knowledge

最先端の研究知識を有効に活用することが可能です。

We can make effective collaboration based on cutting-edge research knowledge.

Research

単独研究、共同研究という形で、新事業のお手伝いが可能です。

We can support new businesses in the form of independent research and joint research.

Company Profile

We possess the technology to make single-layer graphene and graphene oxide from graphite, and manufacture and sell them. Various types of graphene derivatives can be provided according to the customer's request. We are also researching and developing new production methods such as continuous processes.
